## TRUST

---

Promoting confidence and partnerships with our clients to secure a more robust commitment to safety and security.

## HONOUR

---

Act with pride and professionalism in the best interest of the private security profession

## IMPARTIALITY

---

Conduct yourself with impartiality, fair and objective decision making without being prejudice

## COMMITMENT

---

Dedication and self-devotion in the performance of your security duties.

## ACCOUNTABILITY

---

Acknowledging ownership and accepting responsibility for your actions.

## LEADERSHIP

---

Act as a role model for new employees and your team, and demonstrate your leadership skills when required.

## WHAT WE DO

**CONSTRUCTION SITE SECURITY:** – Providing security for construction sites can be particularly challenging because the site changes physically as it is developed and built. It varies in value as it grows.

**PHYSICAL SECURITY:** – Physical measures mean infrastructure and include technical systems such as intruder detection, lighting, CCTV, access control systems, and containment measures and obstacles such as fences, gates, barriers and bollards.

**OPERATIONAL SECURITY:** Operational measures are human activities, including guarding and carrying out all security operations on site according to the Site Security Policy. Guarding generally includes patrolling and static defending, processing people and vehicles in and out of the construction site, managing and operating the technical systems, responding to incidents and liaising with the site manager.

**MOBILE PATROL SERVICES:-** In basic terms, a mobile patrol involves a security officer visiting the premises an agreed number of times.

**CROWD CONTROL SECURITY:-** CNP's crowd management is about managing expected and unexpected crowd occurrences. Crowd control can involve privately hired security guards as well as police officers. Crowd control is often used at large, public gatherings like street fairs, music festivals, stadiums and public demonstrations. At some events, security guards and police use metal detectors and sniffer dogs to prevent weapons and drugs from being brought into a venue.

## WHAT WE DO (CONT...)

**PARKING AND PARKING LOT SECURITY:** Mitigating the parking risks requires creative design measures, including parking restrictions, perimeter buffer zones, barriers, structural hardening and other architectural and engineering solutions. Operational standards inspect or screen vehicles entering parking garages. We use closed-circuit television cameras connected to the security system to videotape lot activity etc.

**APARTMENT COMPLEX SECURITY:** Security is one of the main reasons most residents choose Apartment Living. Gated complexes usually are walled and protected with the presence of security guards at gates.

**EMERGENCY EXPRESS SERVICES:** Emergency and security services exist to deal with extraordinary and life-threatening situations. The people who work in such services are therefore confronted with events and circumstances that lie outside the usual experience of human beings in their daily lives.

**LOSS PREVENTION SERVICES:-** A loss control program should help reduce claims, and insurance companies reduce losses through safety and risk management information and services.

**SPECIAL EVENTS:** A special event is a function or “occasion” that aims to generate money for the community group or not-for-profit that stages it in fundraising terms. There are many different special events, each with its extra level of complexity and suitability for other groups.

## CLIENTELE

---

- Service NSW
- Transport NSW taxi ranks (State Transit Authority – STA)
- Department of Human Services (DHS, Centrelink)
- TNT (Now FedEx Express).
- Port Botany, we provide a workforce.

Hours Weekly.”**

## OUR EXPERTISE

### PATROLLING

Canberra Night Patrol's physical security services include Staff Escorts & Welfare Checks, Security Patrol Services, crowd control, armed guards and unarmed guards, event security, night security, and unique ops-tech capabilities mean we are well equipped to deliver a range of bespoke security services across your entire business.

### ALARM RESPONSE

Canberra Night Patrol provides an optimised experience; whether they need a static guard, mobile security patrol, Night Security, armed or unarmed guard, crowd controller, event security or additional security service, our trained security personnel can support your business to focus on its core operations.

### CONTROL ROOM

We provide parking lots with closed-circuit television cameras connected to the security system and adequate lighting capable of displaying and videotaping lot activity etc.

### ACCESS CONTROL

Effective crowd management is about managing expected and unexpected crowd occurrences. Crowd control can involve privately hired security guards as well as police officers. Crowd control is often used at large, public gatherings like street fairs, music festivals, stadiums and public demonstrations. At some events, security guards and police use metal detectors and sniffer dogs to prevent weapons and drugs from being brought into a venue.

## CUSTOMISED SOLUTION

Canberra Night Patrol focused on delivering a safer workplace for all clients with a specialised guarding division, Certified Protection Officers, also known as CPO. Our frontline CPOs complete specific training in various roles, including general guarding, post guarding and special duties.

Canberra Night Patrol will continue to collaborate with our key partners to provide adequate responses to a safer workplace in 2021 and onwards.

Each client will be allocated a personalised security adviser to communicate with on a 24/7 basis. Your adviser will hold extensive experience in your area of service and ensure our security services are maintained at your level of service expected from Canberra Night Patrol.

## FIVE-POINT EVALUATION CRITERIA

Rigorous pre-employment testing and evaluation help us screen for the only most qualified officers. Our unique 5-point evaluation criteria include:

1. Appearance, speech and verbal communication skills.
2. Clear and concise written communication skills.
3. Background investigation via fingerprints and police clearance certificates.
4. Employment history with verifiable work references.
5. Honesty and industry testing computer-scored pre-employment tests to measure and evaluate each job applicant's attitudes toward understanding the security industry's general rules and regulations under the crimes act.

Lastly, we test for maturity, empathy and calm judgment necessary to respond effectively when a security problem arises.

Our recruiting process yields one Canberra Night Patrol Security Officer for every ten applicants. While our recruiting methods are meticulously thorough, they demonstrate a long-term investment in our officers, our company, and our clients.
